About Me

Results-driven Engineering Manager with 10 years of overall IT experience and a strong desire to contribute to developing valuable new age products like launching UPI soundboxes and Card devices. Also a highly skilled Android Developer with a strong background in system design and architecture, project management, and technical design, with a proven track record of delivering innovative solutions that meet customer expectations.

Skills

- Project and Oncall Management Skills
- Agile Scrum & SAFe Methodologies
- OKR & Annual Roadmap Planning
- Strategic Planning & Execution

COMPETENCIES

- **Management & Analytics Tools** - Sprint Planning(JIRA), Zenduty, Coralogix alerts, Firebase, Crashlytics, GreyLogs, RedShift.
- **Programming Languages** - Kotlin, Java, Android native, HTML
- **Sync Frameworks** - Mongo Db, Realm Db, Couchbase.
- **Databases and Caches** - MongoDB, Realm dB, MySQL, Room, SQLite, Big Query, Shared Preferences.

Work Experience

Engineer Manager , Lead Razorpay

2022 - Present

- Direct a team of 7 software engineers in the innovative design, development, and execution of scalable, extensible software solutions.
- Led and Conceptualised the first Dynamic and Static QR Soundbox Development for Payment acceptance on UPI and launched for 3 banks with 1 lakh+
- Improved metrics in **forecasting, testing pass rates, code quality, and design consistency.**
- Established a new process called an **Individual Development Program** to hear the voice of engineers, provide opportunities for career growth, and keep projects moving forward. Resulted in the promotion of **50% of teammates to higher positions.**
- Elevated quality of deliverables, in turn, reducing escalations by acting as a Manager to service provider staff to **coach on-call Technical Leads** on communication skills, delivery of feedback, and partnership cultivation.
- Worked on **alert monitoring systems** and **automated the 700+ test cases** for the Android payment app to track the errors on the field.
- Rolled out a technical review process to pinpoint and address capability gaps and improve approach and delivery. Project overages have decreased to below the organizational target of 15%.

Senior Software Engineer II Athenahealth

2019 - 2023

- Properly designed and developed the app for a better look and feel by automation, salesforce, sonar lint, analysis of code smell, and taken care to deliver a bugs-free product. Covered design, development, **80% > unit testing & automation.**
- Completed the **Automation testing/UI testing** of free and paid users, which stabilised 90% of the build & created **Cron Jobs** for automation testing in aws by using **Espresso & UI Automator.**
- **Hands-on Integration testing** & spike on Screenshot testing by using Firebase tools. Worked on Wiremock server by using **Docker** so that test cases could run on **Mock Live data.** Use of **Sonarqube** for testing reports to analyze the project code. Worked on A/B testing and sanity testing/patches. Contributed more than 20,000 unit test cases & 1000 UI test cases for our Epocrates app.

Strengths

- **System Design & Application Architecture** Good hands-on experience in the design and architecture of complex payment solutions
- **Team Management & Mentorship** Hand-on experience with managing and mentoring a large team
- **POS Device Integration & Bank Certifications** - Excellent command of payment integration and certification
- **Analysis** - Strong analytical and communication skills, adept at market research and data analysis.
- **Technical Leadership & Strategic Planning** - Proven ability to drive product vision and manage cross-functional teams.
