About Me

Engineering Manager & Architect with 10 years of experience delivering high-scale products, including UPI Soundboxes and Card-payment devices. Proven track record of driving ₹60 Cr in revenue by leading cross-functional teams and bridging complex system design with AI-driven monitoring. Expert in building resilient Android architectures and scalable fintech solutions from the ground up.

Education

Nagpur University, Bachelor of Engineering in CS. 2009-2012

Skills

- Technical Leadership & Strategic Planning
- System Design & Application Architecture
- POS Device Integration & Bank Certifications
- Negotiation
- Critical Thinking
- Analytical Skill

Experience

Engineer Manager , Lead

Razorpay

2023 - present

- **LMS Product Ownership (End-to-End):** Directed the design and launch of the Lounge Management System (LMS), managing cross-functional delivery for high-volume merchants like Adani GMR and TFS.
- **AI Alerting & Monitoring:** Built an AI-driven monitoring suite using Claude, Cursor, Zapier and Zenduty to automate incident detection, reducing notification latency by 80%.
- **Engineering Leadership:** Direct a team of 7 engineers to build scalable software that generated **₹60 Cr in revenue over the last 6 months**, while maintaining project overages below 15% through rigorous technical reviews.
- **Fintech Innovation UPI/Cards:** Conceptualised and scaled the first **UPI Soundbox and Card-based device solutions** in the market; managed the deployment of 100k+ devices for top-tier banks, ensuring robust hardware-to-software payment synchronization.
- **Operational Excellence:** Developed tiered **SR alerting logic and automated 700+ Android test cases** to track real-time field errors and improve system stability.

Senior Software Engineer II

Athenahealth

2019 - 2023

- **End-to-End App Architecture:** Designed and launched a high-performance app using Salesforce and SonarLint for code-smell analysis, achieving 100% unit/automation test coverage and a bug-free production release.
- **Data Synchronization & Scalability:** Engineered a robust device-to-backend sync engine using delta-syncing with MongoDB (Realm) and Couchbase, ensuring seamless real-time data consistency.
- **Navigation & Deep-Linking:** Architected a scalable navigation strategy using Jetpack Navigation and Firebase Dynamic Links, ensuring backward compatibility and optimized user flow through contextual linking.
- **Automated QA & DevOps:** Stabilized 90% of builds by deploying automated UI testing via Espresso and UI Automator on AWS; utilized Wiremock and Docker for mock-live data testing and explored screenshot testing via Firebase.

Software Developer I

Onmobile Global Ltd

2015 - 2019

- **Global Telecom Leadership:** Directed 9+ international projects (Vodafone, Airtel) delivering complex Video Ringback and playback modules using ExoPlayer and Jetpack.

Software Developer I

Lift Off

2014 - 2015

- **Wearable Development:** Engineered a secure, privacy-focused Tizen-SDK application, architecting a custom socket connection for seamless data synchronization between Samsung and Gear devices.

Software Developer I

Notion Ink

2013 - 2014

- Worked on 1st Tab launched in India by creating multiple apps like Rich Notepad (What you see what you get Notepad), Slide Show (Digital Advertisement Application) and Battery Utility Test
